

Authorized IMAP Users

IMAP is an online application which allows underground facility owners to directly view, edit and submit their mapping databases for receiving locates. To use this option each district code may have one person do ALL the edits and verifications OR have two people, one who edits and one who verifies. A member may also manage their mapping database by submitting digital shape files or by submitting paper maps.

Editor: This person will make all additions, modifications and deletions to the mapping database.

Company Name: _____
District Code: _____
Contact Name: _____
Mailing Address: _____
City: _____ **State:** _____ **Zip:** _____
Telephone: _____
Email Address: _____
