To: Missouri One Call Member

Subject: Discontinuing Audit Report

The purpose of the daily audit report is to give the member the ability to compare the number of tickets received against the number sent from the call center. In addition the audit signals the call center that the receiving site is functioning.

If an audit report total is higher than the number of tickets received for that day, the member can then identify and request that the missing ticket be retransmitted.

Without being able to make that comparison, it is possible that the member would never be aware of the existence of a ticket sent by the Call Center that was not received.

We can "turn off" your daily audit report but need documentation of your request in the event that a locate request sent but not received becomes an issue.

MOCS can stop sending the daily audit report; however you must sign this exemption notice.

Complete the section below and fax to 573-635-8402.

I request to receive a daily audit report ONLY when locate requests are transmitted by the Call Center.

Company: _____

District code (s): _____

Date: _____

Signature: _____

This request must be signed by the Legal/Administrative Contact entered on the membership information forms.
